

Compact Disc Tote for portable Compact Disc players and other small audio equipment

## ABSTRACT

A pouch in the general shape of a portable compact disc player designed to encase such as compact disc player or small audio equipment. The pouch is made of various sturdy materials such as leather, cowhide or other similar products. The pouch is designed with various frontal shapes to accommodate the shape and size of the design of the compact disc player or other small audio equipment. It can be manufactured with specific shapes and designs for use with specific audio units. It is incorporated with a waterproof plastic face and orifice for acceptance of headphones/earphone plugs. The Compact Disc Tote has a zipper around the base for easy access to inserted compact disc player or other small audio equipment. Compact Disc Tote is designed with a belt clip for attachment upon user's waistband. The Compact Disc Tote protects the contained unit from outside elements and from accidental falls and drops. It provides a convenient way to carry the compact disc player or other small audio equipment instead of being hand held.
